

GUARDIAN® SERIES 25-60 kW AUTOMATIC STANDBY GENERATORS

*Robust backup power protection for
large homes and small businesses*

Smart, User Friendly Controls

Control generator diagnostics and get information at a glance with Generac's user-friendly Nexus™ Controller—the most comprehensive available.

Weather-Resistant Enclosures

Our galvanized steel enclosures feature the RhinoCoat™ finish system, which evenly joins paint particles to every part of the metal surface for consistent coverage and exceptional protection.

Rugged Commercial Engines

These commercial engines are built to withstand the rigors of generator use, and pack more power into a smaller footprint than many competitive engines.

Remote Monitoring From the Comfort of Home

Generac's wireless remote monitors (sold separately) allow you to observe generator status, set operation parameters and more—all without leaving the comfort of your home.

Stand Up to Unpredictable Power Outages

Whether it's due to severe weather or simply an equipment malfunction, Generac's Guardian® Series can back up all of your home's circuits during a power outage. Or protect your bottom line by keeping your business up and running. Connected to the existing LP or natural gas fuel supply, it kicks in within seconds of determining power loss—automatically—and runs for as long as necessary until utility power returns. With Generac's Guardian Series, life won't miss a beat.

25-60 KILOWATTS

Ideal for larger homes requiring complete whole-house coverage, and small to medium sized businesses.

- Generac's automotive-style liquid cooled engine packs more power into a smaller footprint than many competitive engines
- Easily connects to existing LP or natural gas fuel supply; quickly convert in the field for up to 45kW
- Quiet-Test™ weekly self-test mode - runs at a lower RPM and is quieter than other brands, consumes less fuel, and produces fewer emissions
- Galvanneal steel enclosures feature RhinoCoat™ finish for superior weather protection
