

**THE POWER'S OUT EVERYWHERE ELSE.
BUT YOU'RE STILL RINGING UP SALES.**

When a bad storm or utility failure knocks out your power, be the business that stays up and running. KOHLER® generators keep your customers coming and your business in business.

KOHLER® Generators

Why KOHLER®?

You can trust a KOHLER generator – for good reasons.

It just works.

Every KOHLER generator is extensively quality-tested – before model release *and* before leaving the factory. The result is proven reliability.

It can power everything.

In as little as 10 seconds, it automatically powers your HVAC, lights, coolers, cash registers and computers. All at the same time.*

It comes with the best warranty.

You get our exclusive 5-year warranty, 2,000-hour protection, plus a corrosion-resistant enclosure that's built to last.**

It protects your electronics.

A KOHLER generator creates steady, high-quality power, which means your computers and electronics are protected from erratic power surges.

It's trusted everywhere.

Hospitals, nuclear power plants, even the National Weather Service trust in hard-working, long-lasting KOHLER generators.

*Based on generator and load size

**14 and 20 kW models feature corrosion-proof enclosures; all other models feature corrosion-resistant enclosures.

Find the perfect size for your needs.

The Power’s Out Everywhere Else. But You’re Still Ringing Up Sales.

Keep your food fresh, your gas pumping and your cash register ringing. Whatever the weather’s doing doesn’t matter. When a bad storm or utility failure knocks out your power, a KOHLER® generator keeps your business in business.

We have a Ph.D. in power.

In just 10 seconds, KOHLER generators can automatically power your HVAC, lights, coolers, security systems, cash registers and computers – all at the same time.[†]

We eat, sleep and breathe quality.

Every KOHLER generator is meticulously quality-tested, start to finish. Once the design passes our inspection, it’s ready for production. Before it leaves our factory, we put it through its paces one more time. The result is total reliability.

We build them to outlast the outage.

Inside every KOHLER generator is a commercial-grade engine built to withstand extreme workloads over many years. (Think heavy-duty construction equipment.)

We back it with a premium warranty.

You get our 5-year, 2,000-hour protection, plus a corrosion-proof enclosure that’s built to last.^{††}

We’re trusted everywhere.

Hospitals, nuclear power plants and even the National Weather Service trust in hard-working, long-lasting KOHLER generators.

We’re 93. And only getting better with age.

We built our first generator in 1920. Since then we’ve had one simple goal: build the best generators in the world.

[†] Based on generator and load size.
^{††} 14 and 20 kW models feature corrosion-proof enclosures; all other models feature corrosion-resistant enclosures.

RATINGS: Standby ratings apply to installations served by a reliable utility source. All single-phase units are rated at 1.0 power factor. The standby rating is applicable to variable loads with an average load factor of 80% for the duration of the power outage. No overload capacity is specified at this rating. Ratings are in accordance with ISO--3046/1, BS5514, AS2789 and DIN 6271.

Accessories

NEW PRODUCT **PowerSync™ Automatic Paralleling Module**
Runs one generator when power requirements are low; automatically starts, syncs and connects your second generator when power demand increases. Requires two 14RESA or 20RESA models.

OnCue® Management System
OnCue lets you view real-time power operation and manage your generator remotely. It can even send status updates to you or your KOHLER dealer – without a cellular contract – so you’ll never have to worry.

Load Control Module (LCM)
Prioritize what you power, even if you buy a smaller generator. During a power outage, the LCM cycles circuits on and off to prevent overloading.

6VSG Generator
For renewable energy such as solar power and remote applications. Battery-charging generator efficiently charges battery banks when energy sources can’t keep up with demand.

Programmable Interface Module (PIM)
Lets you activate critical items like storm shutters or security system when you’re away (when used with OnCue).

RXT and RDT Transfer Switches
Required with every generator. Automatically transfer power from utility to generator and back to utility when power is restored.

*Non-standby warranty of 18 months or 1000 hours available on 6VSG, 8.5/14RES models 8.5RES, 14RESA, 20RESA 38RCL and 48RCL
**5-year extended warranty is an included option for quick ship 40 – 125 kW models 60ERESB-150ERESC
